East Berlin November 9th 1989: Press Conference GDR

Underestimating "open" and what it really means...

Famous two words: "sofort, unverzüglich"

"Privatreisen nach dem Ausland können ohne Vorliegen von Voraussetzungen (Reiseanlässe und Verwandtschaftsverhältnisse) beantragt werden. Die Genehmigungen werden kurzfristig erteilt. Die zuständigen Abteilungen Paß- und Meldewesen der Volkspolizeikreisämter in der DDR sind angewiesen, Visa zur ständigen Ausreise unverzüglich zu erteilen, ohne daß dafür noch geltende Voraussetzungen für eine ständige Ausreise vorliegen müssen. [...] Ständige Ausreisen können über alle Grenzübergangsstellen der DDR zur BRD bzw. zu West-Berlin erfolgen."

Auf die Nachfrage des Hamburger Bild-Zeitungsreporters Peter Brinkmann^[14] "Wann tritt das in Kraft?" antwortete Schabowski:

"Das tritt nach meiner Kenntnis ... ist das sofort, unverzüglich."[15]

... one hour later: "Prompt" means "open borders"

Berlin November 9th, 23.30 "we are flooding"

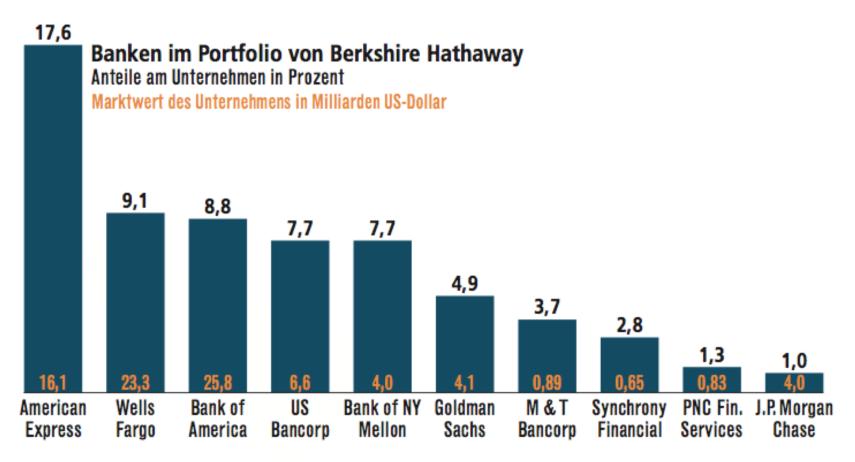

Berlin November 10th, 1.30 am "Mauerfest"

Customers demand a more comprehensive and personalized banking experience, but banks struggle to deliver a delightful last-mile experience

As BigTechs and challenger banks redefine the financial services paradigm with a customer-centric focus, they are capturing customer midnshare in the last mile

Open banking will play a vital role in transforming the customer banking experience but is characterized by false starts and missed expectations

Example of bad user experience

Facebook Libra: New Financial Ecosystem from the ground up

Libra Blockchain overview

Facebook yesterday unveiled its new low-volatility cryptocurrency Libra, powered by a smart contract platform that's designed to be "secure, scalable, and reliable".

David Marcus

Follow

10/ Libra has 3 distinct components:

- 1) a BFT-based (LibraBFT) permissioned (to start) scalable blockchain;
- 2) a reserve-backed cryptocurrency designed to be a medium of exchange;
- 3) a new programming language (Move).

4. Solution: The ecosystem approach

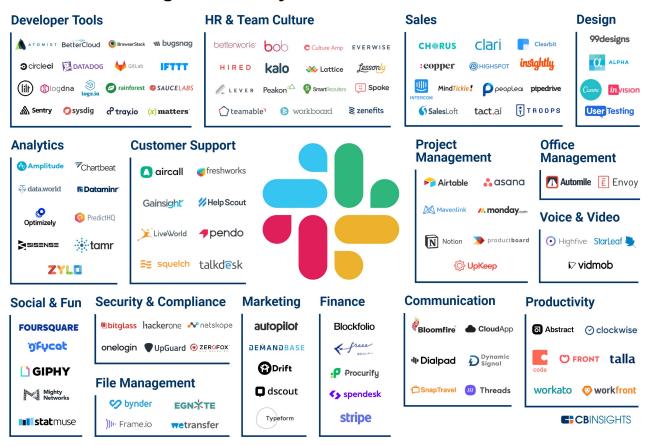

Embedding FinTech in the banking ecosystem

The most successful banks will be those that improve agility and reduce costs by collaborating with a range of different partners to build the strongest ecosystem. Banks can't do it alone; the culture must be done of collaboration.

But to achieve this future state, banks will neet to unleash the potential of FinTech in their own organizations. Ultimately, both banks and FinTechs must work better with each other to successfully drive innovation.
